61 Forsyth St. S.W. (4PM-1F)
Atlanta, GA 30303-3104

Sir or Madam,

Good Day! Our company sells *Bacteria for Water Pollution Control* to waste water treatment plants. We have hired a new technical sales representative for the state of Kentucky. She will be visiting industrial and municipal waste water treatment plants by phone and email to introduce herself and our company. She then will be following up with personal visits, where applicable. Under the Freedom Of Information Act, I am requesting a listing of **Industrial and Municipal waste water treatment plants that have a direct discharge NPDES Permit in the state of Kentucky. Non waste water treatment plant permit holders such as parking lot and storm water run off as well as mine exploration storage ponds may be eliminated from this listing, as we have no application if there is no pollution control treatment for organics.** Our market is the sewage and industrial treatment facilities.

I request the listing be arranged thusly:

By County in Alphabetical Order. Then within that county an alphabetical listing of the plants named with address and phone number. Where possible we request the person to contact including their phone number and email address. There is no need to separate municipal and industrial nor major or minor permit holders in the listing as she will be working by county and in geographical regions.

Please send the information by Flash Stick or CD preferably in a Pdf or word format as we will be printing it out on 8 1/2 x 11 size paper for her. I understand there may be a fee for this request and agree to pay those charges. If you have any questions about this request, please call, fax or email me. Thank you in advance for this valuable service.

Regards,

Dick Marcheski
